THE REDCLIFF REVIEW THURSDAY, OCT 11th, 1934

Number 50

Interesting Lecture on Scandinavian Countries

Was Given By Mr. D. Cameron, B. A., of Extension Dept.

Cliff Hall was well filled for the illustrated lecture held there last Thursday evening when Mr. Donald Cameron, B.A. of the Extension Department of the Alberta University gave a most interesting and educational address on "The Folk High Schools in Scandinavia." Mr. Cox acted as chairman and Mr. Hector Lang M.L.A., who was instrumental in bringing Mr. Cameron here, introduced the speaker.

In his opening remarks, Mr. Cameron expressed the idea that Scandinavian countries were leading the world in educational matters, and proceeded to outline a number of advanced movements now in operation in these countries. Principal among these were the Folk High Schools which were established as a community enterprise for the development of the older boys and girls who had left school but who were anxious to better prepare themselves as good citizens and leaders in the community. Particular reference was made to the wonderful development of Denmark where government legislation had been passed for the encouragement of community life in the rural districts and for farming operations.

Although Denmark is only about one twenty eighth the size of Alberta and has a population of three and one one million it has over 2000 co-operative enterprises.

During the present world depression Denmark had not found it necessary to reduce wages and only 2 per cent of her population were unemployed.

Very interesting pictures of Denmark, Norway and Sweden were shown giving a vivid conception of both urban and rural life in these countries.

At the close of the lecture votes of thanks were tendered to Mr. Cameron for his instructive address and to Mr. Lang for arranging the event.

Vega Rebekah Lodge will hold their annual masquerade dance on Wednesday, Oct. 31st in the I. O. O. F. hall. Keep the date in mind.

Mrs. J. R. McKennie was the hostess at a delightful bridge party on Tuesday evening in honor of her sister, Miss Vail, of St. Thomas Ont. The honoree for the evening went to Mrs. Earl Cooper of Medicine Hat.

A fire in Igloo Island did damage estimated at \$20,000. Three Oil Companies lost sheds, two C.P.R. tank houses were burned and a tank car was destroyed. It is thought that the fire started from an engine exhaust pipe.

Mr. and Mrs. Geo. Lydiatt of Vancouver, who are on their way east for a short holiday stopped off here on Tuesday when they were the guests of Mr. and Mrs. R. S. Hodges. Mr. Lydiatt who will be remembered as the manager of the Dominion place Co here for several years, is now a director of the company.

St. Mary's Ladies Have Successful Evening

Fowl Supper and Dance Were Well Patronized

St. Mary's church ladies had their annual fowl supper in Cliff Hall last Monday evening and the large crowd which attended were delighted with the appealing dinner and excellent service. The tables were artistically decorated for the occasion and the busy of smart ladies who waited on them made the patrons feel at home and enjoy the more than faintly viands.

It required several settings of the long rows of tables to accommodate the numerous guests, among whom were a number from Medicine Hat.

After the supper bridge and whist were played and the evening's program was brought to a close with a dance. In the card games there was keen rivalry to the finish. In bridge honors went to Miss Annie Shaw and Mr. Pallie, and consolations to Mr. L. Henderson and Miss Henderson.

Mrs. Margaret Stratton and Ed Schmidt won the first prize for whist and Mrs. A. Fitzhenry and Mrs. A. McKinnon the consolation.

The hall was also well filled for the dance and the excellent, splendid condition of the floor, jovial crowd and dainty lunch, left nothing to be desired for an event of this kind.

On the whole this anniversary occasion was a great success and both the patrons and the ladies of St. Mary's were well pleased with the results.

Services will be held in the churches as usual on Sunday next.

Mrs. T. Jones is attending the meeting of the Synod being held in Regina this week.

Mr. and Mrs. A. R. Gagnon announce the marriage of their daughter Wynona Adeline to Mr. Harry Aspin on Friday, Sept. 25th, 1934, at 4:30 p.m. in the First Baptist Church, once River, Alberta. At home—Warrensville, Alb. A.

The hardest job a kid faces is that of learning good names without seeing any.

Mrs. Mollvegus was the guest of honor at an enjoyable bridge party given by Mrs. G. Myers on Friday evening. First prize went to Mrs. Joe Pedersen and consolation to Mrs. Newham.

Mrs. Dicken, mother of Mrs. Cox, formerly of St. Andrews, Leamington, died in Medicine Hat Tuesday at the age of 88 years. The sympathy of their many friends in Redcliff will go out to Mrs. Cox and Viva at this time.

Mrs. Leppard was the hostess at a three table bridge party on Thursday evening in honor of Mrs. Mollvegus. First prize went to Mrs. B. Hurlbert and Mrs. G. Myers won the consolation. The hostesses also presented Mrs. Mollvegus with a dainty gift.

Mr. and Mrs. F. Smith Have Silver Wedding

Large Number of Friends Met at Terra Nova School

Of interest to many friends of Redcliff was the silver anniversary of Mr. and Mrs. F. Smith, of Cherry Grove, just north of town. A number of friends of Mr. and Mrs. Smith met at Terra Nova school to join with them in celebrating the occasion. Seventy guests arrived and a musical program was presented by Miss F. Palmer, Miss J. Riley, Miss Betty Watson, Mrs. F. Smith and Mr. Herbert Smith.

Dancing commenced at ten o'clock and supper was served at midnight.

After supper Mrs. Wheeler of Redcliff presented Mr. and Mrs. Smith with several sets of handsome silverware from guests and bouquet of pink roses to Mrs. Smith. A career wedding cake was made and presented by Mrs. Wilson Riley of Medicine Hat, and cut by Miss Ireland.

A letter by Air Mail from relatives in Pittsburgh, enclosed congratulations and cheer.

Dancing was then resumed until 2 a.m. Music for the dance was supplied by Mr. and Mrs. Larson of Box Springs.

Lloyd Returns to Screen in 'The Cats Paw'

Now Showing at The Monarch Theatre, Medicine Hat

"The Cats Paw" which opens today at the Monarch Theatre is the original title of the Clarence Budington Kelland novel which supplied the plot for the comedy Harold Lloyd has brought to the screen in his picture. Lloyd appears first in the play as the son of an American missionary who has spent virtually all his life with his father in the interior of China. At twenty-seven, he has found it time for him to return to his native land and seek himself a wife. He is thrown into the madhouse.

He is in an American city of 19,000. He unknowingly becomes the tool of unscrupulous schemers, but when he becomes mayor of the city, through accident, he tries to apply Chinese philosophy to his operations for the government.

In his efforts to clean up the town, he has the caustic support of a cigar counter girl, played by Una Merkel, and a loveable political rogue, portrayed by George Barbier.

CHINA WANTS MORE ALBERTA HOSES

Whether or not the Orient is preparing for war, the fact remains that China is making a demand on Canada for cavalry and artillery horses, and some of this demand have reached Alberta from Ottawa. This province should be able to produce 500 head or so of such animals. It is believed by those who should know, and a canvass of the situation is now being made in reply to the queries from Ottawa.

Advice To Farmers Regarding Grasshoppers

Destroying Eggs Will Require Pest Next Season

Grasshoppers will be with us again next year, according to the provincial field crops branch which issues a warning to farmers and some advice as to cultivation to minimize the infestation next spring. It is pointed out that any tillage that can be carried out to destroy eggs in the soil will reduce next year's outbreak for such an extent that poisoning will only be necessary along the edges of fields. Farmers are urged to keep in touch with the department at Edmonton, or the provincial Entomological service at Lethbridge for further advice on the problem.

Mr. and Mrs. H. J. Cox were visitors in Calgary over the weekend.

Mr. Bentley, Dougan of Medicine Hat was a visitor in Lethbridge Tuesday evening, when he attended the Oxford Group meeting in Gordon Memorial Church.

Mr. and Mrs. J. R. Cann and as their guests for Thanksgiving Day, Mrs. Cann's mother and sister, Mrs. and Miss Bassett of Medicine Hat and Mr. and Mrs. John Mitchell and children of the L. A. Ranch.

WEDDING BELLS

A quiet wedding took place on Wednesday morning Oct. 3, 1934, at St. Patrick's Church, Medicine Hat, when Doris, only daughter of Mrs. Bainbridge of this town became the bride of Mr. Wilfred (Tom) Migneault, second son of Mr. and Mrs. Migneault, of Tompkins, Sask. The bride who was becoming: gown in gray with matching accessories was attended by Mrs. N. Willis as Matron of honor who also wore an ensemble of gray, while Mr. N. Willis supported the groom.

Mr. and Mrs. Migneault will reside in Redcliff.

JUST FOR FUN

At least one man—a chemistry professor at Harvard—kept his promise to "eat his shirt" when he was proved to be wrong. He dissolved his shirt in acid, neutralized the acid with a base, filtered out the precipitated material, spread it on a piece of bread and ate it.

Nose rubbing is more widely used by mankind as a greeting than any hand shaking and kissing combined.

One of the greatest acts of courtesy in history took place at the Battle of Fontenoy in 1745. As the armies met, the English invited the French to fire first. The French refused and asked the English to begin which they did—killing fifty officers and 760 men with the first volley.

The government education now say that the small savings bank trains children to be misers. Our observation is that it teaches their parents to be bank robbers.—Maclean

Short Session of Council Wednesday

New Business To Come Before the Meeting

At last Monday was a holiday, the regular meeting of the town Council was not held till Wednesday evening of this week.

Mayor Cox was in the chair and Councillors present were Messrs. Brylle, Myers, Brighouse, Saugate, and Newham.

It was a very quiet session. There was no new business to come before the meeting.

The agreement to draw a road by Solicitor Baird re-named Cliff Hall to Quarry 1, approved by Council.

A letter was read from Solicitor Blanchard on behalf of John Soukup Jr. re license paid by him for selling radio parts. The matter was referred to Solicitor Baird for investigation.

The request from the school board for \$1000 was granted. Accounts as passed by the finance committee were approved for payment.

The secretary was instructed to make a list of machines in possession of the town and have them set on same.

'Operator 13' Hit Film; Has Romance & Action

One Spy Against Another

In her new Metro-Goldwyn Mayer Cosmopolitan picture "Operator 13" which opens Monday at the Monarch Theatre, Mrs. Davies appears as the lovely, lovely Union spy who is sent into the South to seek and slay the Confederacy's valuable scout and spy, Captain Jack Galligan. With Gary Cooper plays the roll of Galligan and the love companion that springs up between these two enemy spies provides one of the most romantic stories to reach the motion picture screen.

With the Civil War as a colorful background, "Operator 13" based upon Robert W. Chambers' last and greatest novel, is crammed with interesting sidelights upon one of the least known phases of the rebellion, the espionage systems of the armies of the North and South.

ASSISTANCE GIVEN TO GRAIN EXHIBITORS

Assistance usually granted by the provincial department of agriculture to seed grain exhibitors at the Royal Winter Fair, Toronto, and the Chicago International, will be forthcoming this winter, according to announcement made by department officials. In connection with exhibits of seed grain at the Royal Winter Fair, which is held during the latter part of November, the province will pay the entry fees and freight, shipping costs to Toronto on approved exhibits in classes for seed or certified seed and on exhibits in the junior club classes.

Mrs. and Miss Morrison of Medicine Hat, spent Thanksgiving Day in town, the guests of Mr. and Mrs. W. Thacker.

Little Theatre Asso. Holds Social Evening

Was One of the Most Successful Since Asso. Organized

Redcliff's Little Theatre Association got away to a promising start last Wednesday evening when members and their friends met for a social treat in St. Ambrose Parish Hall.

A program had been prepared for the occasion and after some business in connection with the association had been transacted lunch was served. Community singing followed and then a game in a pleasant home-like atmosphere.

During the business hour Mr. A. N. Collard was chosen as business manager and an entertainment committee was selected. This committee will be Miss McWaine, Mrs. Hargrave, Mr. King and Mr. George Thomson. It will be the duty of this committee to prepare programs for the monthly gatherings to be held during the winter months.

The social last Wednesday evening was one of the most successful and enjoyable the Association has yet held and according to reports from several committees, membership tickets are selling most encouragingly.

During the evening Mr. King gave an interesting address on the aims and objects of the Little Theatre movement, and he stressed the advantage to be gained by being interested in the association.

Similar meetings are to be held monthly and it is hoped to have a representative from the dramatic branch of the Extension department of the University at one of them in the near future.

Arduous plans are well under way for the first performance of three one-act plays in the Little Theatre some time next month.

Banks Will Assist In Refunding Loan

For the particular convenience of new investors who wish to subscribe in modest amounts for the bonds of the 1934 Refunding Loan, the chartered banks have agreed with the Dominion Government to loan up to 75% of the par value of bonds purchased by new investors. For example, a \$100 bond may be purchased with a deposit of \$25; a \$500 bond with a deposit of \$125; and a \$1000 bond with a deposit of \$250. In each case the balance of payments may be spread over periods up to six months, and the banks will carry the loan at 1% interest.

An interesting analysis of wheat inspections so far this year reflects the effects of the early heavy frosts on the grain in the northern districts, but reveals also the very gratifying information that southern Alberta has not only weathered much more wheat at this date than was the case last year, but that the grades are just as good if not a shade better.

Labor Saving Inventions Lead To Freedom From Soul Destroying Toil And Much Routine Work

If science is to be blamed for all the ills that have beset mankind in late years—including soul-shattering war—then science will accept the blame, but it will not let science be given man control over nature, before he has gained control of himself.

Sir James Jeans, eminent physicist, stepped out of the field in which he is one of the world's foremost leaders to speak on behalf of science at large, when he delivered the presidential address at the British association gathering in Aberdeen.

No doubt, said Sir James, a large part of economic depression and unemployment results from wars, national rivalries, tariff barriers, and other causes that had nothing to do with science. But a real cause must be traced to scientific research, which produced labor-saving devices which in times of depression were only too likely to be welcomed as wage-eating devices, and to put men out of work.

Science gave rich gifts to the community: labor saving inventions which displace labor, more fundamental discoveries which may ultimately lead to new trades and new popular demands providing employment for vast armies of labor. The former led to emancipation from soul-destroying toil and routine work, to greater leisure; the latter to the comfort and pleasure, health and wealth of the community.

"If a perfect balance could be maintained between the two, there would be employment for all, with no continual increase in the comfort and dignity of life," he declared.

"But troubles are bound to arise if the balance is not kept steady, and a steady flow of labor-saving devices with no accompanying steady flow of new industries cannot but lead to unemployment and chaos in the world of labor."

"Unhappily, no amount of planning can arrange a perfect balance. For as the wind blows where it listeth, so no one can control the direction in which science will advance. The investigator in pure science does not know himself whether his researches will result in a labor-saving device or in a new industry."

Crop Testing Plan

To Try To Improve General Quality Of Wheat Grown In The West

During the past three years the Cereal Division of the Dominion Experimental Farms has been interesting itself in a scheme which is known as a "Crop Testing Plan". The main objective of this plan thus far has been to "step up" the general quality of the wheat in the Prairie Provinces by growing in small test samples collected by elevator agents from farmers' wagon at country elevators with a view, first, to ascertaining the names of the farmers who had the best wheat; and, second, to obtain for these farmers information as to the nearest points at which such stock may be obtained. In 1933 the wheat grown over 5,000 farmers was checked according to this plan and it was found that over 40 per cent. of these farmers were growing grain which they should not use for seed. This testing plan is being extended on a comprehensive scale in the West this year and is being tried out in certain districts in the East.

Always Very Near

Happiness Can Be Found In World About Us

True happiness can never be founded upon falsehood. The pursuit of trying are much over-estimated. It pays to be true. At least we shall be at peace with ourselves. When happiness is to be found in the world all about us, in the stillness of a summer night, in the pride of a good thing done, in the flush of an autumn dawn, the following of an ideal, the strong grip of a friend, the perfect heart of a rose, or the wise earnestness of a song. It is always very near.—Dane Nellie Melba.

Workers Could End War

Refusal of the workers to obey the call of the war lords of any country is the only way to frustrate war, John Marchbank, of London, England, told the Trades and Labor Congress of Canada at their convention at Toronto. All wars are capitalist wars, he said, and whether it is the country of the victor or the vanquished the workers suffer every occasion.

W. N. U. 1935

Envious Of Dry Areas

B.C. District Claims To Be Wettest Spot In America

Reports of continued heat waves and droughts in eastern and central Canada are read by residents of the district of Henderson Lake, B.C., with a faint feeling of jealousy.

This is the wettest spot in British Columbia and one of the rainiest in the world.

This doubtful title has been held by Henderson Lake, on the west coast of Vancouver Island, just east of Pilepoint Inlet off Barkley Sound for many years.

F. Napier Denison, superintendent of Gannett's meteorological observatory, just released another batch of statistics which explain to those who can read such things that about two-thirds of an inch of rain has fallen every day during the last 12 months. The lake had a total precipitation of 266.38 inches, a little more than the 11-year average of 253.73 inches. The precipitation is made up of 253.72 inches of rain and 12.66 inches of the latter working out to 12.6 inches of water.

By Ruth Rogers

"If a perfect balance could be maintained between the two, there would be employment for all, with no continual increase in the comfort and dignity of life," he declared.

"But troubles are bound to arise if the balance is not kept steady, and a steady flow of labor-saving devices with no accompanying steady flow of new industries cannot but lead to unemployment and chaos in the world of labor."

"Unhappily, no amount of planning can arrange a perfect balance. For as the wind blows where it listeth, so no one can control the direction in which science will advance. The investigator in pure science does not know himself whether his researches will result in a labor-saving device or in a new industry."

"If a perfect balance could be maintained between the two, there would be employment for all, with no continual increase in the comfort and dignity of life," he declared.

"But troubles are bound to arise if the balance is not kept steady, and a steady flow of labor-saving devices with no accompanying steady flow of new industries cannot but lead to unemployment and chaos in the world of labor."

"Unhappily, no amount of planning can arrange a perfect balance. For as the wind blows where it listeth, so no one can control the direction in which science will advance. The investigator in pure science does not know himself whether his researches will result in a labor-saving device or in a new industry."

Sir John Cadman, famous British oil magnate, is shown above with Lady Cadman as he left London for Norway, New South Wales, Australia, to view the shale oil deposits. The shale oil deposits at Nevers are believed to be the richest in the world. Tests have shown that the oil content averages 100 gallons a ton, and there is believed to be a possible total quantity of shale in the area of 20 million tons.

Consumer Is Master

Determines Type Of Selling Organization That Will Survive

The consumer and his opinion of the Far North must be stimulating. In any event, after a summer in the Arctic, P. Ashley Cooper, governor of the Hudson's Bay Company, delivered at the Canadian National Exhibition in Toronto a forceful address that dispelled some of the smoke surrounding the subject of merchandising in Canada.

Evolution in business has been working toward one great objective, he said—"the greatest number of goods for the greatest number of people at the lowest possible price." And in the process of evolution, it is impossible to forecast what particular type of merchandising organization will survive, whether the individual store, the department store, the chain store or some other. The consumer is the master of the market and the consumer will decide the fate of each.

This is so plain and matter of fact a presentation of the matter that its importance may easily be overlooked. The development of merchandising methods is not going to be directed by the raging of politicians or the analysis of economists but by the survival of the fittest to serve the public.—Financial Post.

Trans-Atlantic Air Service

Canada Looking Forward To Possibilities Of New Airway

Canada is air-minded and ambitious to have an adequate air system of its own and looks even beyond the transcontinental system the new airway will inaugurate to a trans-Atlantic mail-carrying line. The first step will be a 3 1/2-day plane and steamship service from Montreal to London. The experience gained in such a service, it is believed, will lead in good time to a trans-Atlantic mail service along one of the three routes almost think possible, the two shortest of which touch Canada.—Philadelphia Bulletin.

Mixed Several

Wife (to husband, who was inquiring what she thought of his speech): "You did not make the most of your opportunities!" Husband: "What opportunities?" Wife: "Why, all the opportunities you had of sitting down."

Lots of folks would be alive today if their backs, waists, hips they'd saved enough money to take life easy.

Heavy thunder can sometimes be heard 40 miles away, over the sea.

ANOTHER RAILROAD WHICH COULD PRECIPITATE A CATASTROPHE

Committee Looks Forward With Hope To Time When Empire Emigration Can Be Resumed

Good Roads Association

Minister Of Highways For Prince Edward Island Is Elected President

Hon. G. Shelton Sharp, minister of highways for Prince Edward Island, was elected president of the Canadian Good Roads Association at the annual general meeting of the 21st annual convention held at Murray Bay, Quebec.

Other officers were: Honorary President, Hon. J. E. Perrault, K.C., minister of highways for Quebec.

First vice-president, Hon. A. S. MacMillan, minister of highways for Nova Scotia.

Second vice-president, Hon. Frank M. Macpherson, minister of public works and highways for British Columbia.

Third vice-president, Hon. T. D. McQueen, minister of highways for Ontario.

Secretary-treasurer, Gen. A. A. McNamee, Montreal.

A resolution passed urging provincial and municipal authorities to construct sidewalks or footpaths along highways in congested areas. It was decided to memorialize the Dominion government to re-establish a fund for the elimination of gravel crossings.

Upkeep Is Heavy

Budget For Dags Runs Into Many Millions Yearly

There are now in Great Britain well over three million dogs the owners of \$300,000 of which pay for licenses and contribute about a million pounds a year to the Exchequer. America has nearly seven million dogs, and it is reckoned that in New York alone \$370,000 is spent yearly in the upkeep of these animals. In Paris there are 45,000 dogs and the French capital accounts for \$42,000 from dog tax, the license there being fifty francs per dog.

In Britain there are about six hundred dog clubs and societies which, between them, hold more than a thousand shows yearly; prizes valued at more than \$50,000 are presented to winners.

Kennel-minding has become a regular profession, and it is reckoned that \$400,000 a year is paid in wages to the army of men and women whose business it is to look after dogs. As for the money spent on dog food, medicines, clothing, baskets, and on veterinary charges, specialists this must exceed two millions yearly, to say nothing of the millions of capital invested.—Quebec Chronicle-Telegraph.

Thriller Still Popular

People Like Detective Story Written 56 Years Ago

Anna Katharine Green, now 88, of New York City, is the author of one of the first detective stories, 56 years ago, is chucking those days in her Buffalo home.

A sensation in 1878, the book has been such a good seller through the years that new editions have appeared with regularity. Even now she still collects royalty on about 2,000 copies a year.

But what amuses the smiling old lady is that she wrote the book under a nom de plume, in order to make herself known, so she could sell her poetry. The success of the volume was so great she practically gave up writing poetry, however, and concentrated herself with producing detective stories of thrillers, some 30 in all, of which the last, "The Step on the Stair," appeared when she was 75 years old.

Anna Green is Mrs. Charles Holby to her neighbors. She has lived quietly, her husband and children having come before her books. "My family have been everything to me," she says.

All The Same To Her Mrs. Sylvia Ward, resident of Lunenburg, St. Louis, walked in to the county clerk's office with a wolf cub in a box, for which she asked the county's bounty of \$10. The clerk said that the bounty was for dead wolves, so Mrs. Ward stepped out of the courthouse and killed the wolf cub with a hammer.

Precious stones, except the diamond, can now be produced almost artificially. These imitations dry up but the most expert examinations.

"Does your wife talk behind your back?" "No, we don't own a car."

To Canada for ten pounds—or \$50—is one of the aims of the British committee which has been driving into the question of emigration again.

The committee further recommended extension to include the rail rate in three areas, namely: \$10 to Montreal and east of Montreal; \$12 to Winnipeg and east of Winnipeg; Montreal; \$14 to west of Winnipeg.

The present full ocean rate to Quebec is 117 and five shillings.

The committee proposed that the cost of the reduced rate should be equitably shared between the United Kingdom and the Dominion governments, and, or any private organization concerned.

In no case should the United Kingdom exceed 50 per cent, it was added.

The report generally looked forward with hope to the time when emigration can be resumed on a normal course, but it frankly recognized that with the present situation and the prices of commodities and the cost of living, and the fact that the time being on any large scale is out of the question.

Migrants who are to live must be able to sell what they produce in order to buy what they need. "The committee, the minister for most agricultural commodities at the moment is, however, such that even a comparatively slight additional production might well bring the level of prices below their present unremunerative point, and thereby bring disaster to a far larger number of persons than the settlers themselves," said the report. "For these reasons we should regret the discouragement of emigration at the present time as out of the question."

The report commended it would appear to follow that the United Kingdom government can give no greater or more direct stimulus to emigration than by assisting to create increased markets in this country or elsewhere for the Dominion products, thereby breaking the vicious circle whereby low returns to the producer and the low purchasing power of the consumer from and are caused by one another."

Under the best conditions, the report held, bulk goods could be sold for more than 10,000 settlers a year at a cost of \$1,000 per settler, whereas settlement by "infiltration" had in the past accounted for 100,000 to 200,000 a year at a cost of \$75 per person. The committee thus generally favored the bulk goods system.

On deportation, the report observed: "The migrant should be in our opinion be liable to deportation only within a period, say three years after his arrival, and within that period deportation should only take place on the basis of a report from a medical charge for reasons personal to himself, not for reasons applicable to the whole community in which he settled."

"As regards persons who become public charges from physical causes, we would suggest that where such causes arise from accident or illness contracted after arrival, deportation should in no case take place except at the request of the person concerned."

Every endeavor should be made to arrange with the Dominion government to extend the nomination system to cover all classes of emigrants proceeding to Canada, the report stated.

The "boarding-out" system for children should be resumed under defined safeguards.

Gives Credit To Tea

Chief Diet Of Giant Hollyhock States

Winnipeg, Green, the winner of Winnipeg's tallest hollyhock competition and was awarded the \$100 prize.

Tea leaves from the family teapot and a little gentle cultivation spurred Mrs. Kendall's hollyhock to unforeseen heights, and it towered 12 feet 6 inches above the ground. Mrs. Kendall modestly disclaimed any credit for growing the hollyhock, and declared that it was his wife's careful watering with cold tea that brought the hollyhock to its present height.

Blonde are more inclined to be banished than brunettes but brunettes are more inclined to be banished than redheads.

The outlook for egg exports to Great Britain this fall continues bright, says the Egg and Poultry Market Review.

Here and There

What a practical newspaperman finds interesting on a cruise around the world in the Canadian Pacific flagship Empress of Britain can be contained upon a capture the imagination of story-at-bones. Last winter Alan Maurice Brown, a Montreal writer, made the cruise. He saw intriguing places, outstanding people and strange customs. So he sat down and wrote a book which is illustrated by photographs he made with his own camera, filled with sunning sidelights upon humanity. Now, under the comprehensive title "—and ships—and sailing was," the book is on Macmillan's fall list.

That United States investor's capital would flow into Canada in an even greater volume is the prediction of John F. Harlan, of the Mutual Life of New York office in Chicago, speaking before the Life Underwriters Association of Toronto, at the Royal York Hotel recently.

The cream of American baseball players is scheduled to sail from Vancouver, October 30, aboard the Canadian Pacific liner Empress of Japan, for an all-star tour of Japan, China and the Philippines. Judge and Mrs. Kenesaw Mountain Landis may also be in the party.

Photographed in a group for the first time since they were "shot" on their arrival in Canada a few years ago, His Excellency the Governor-General, Her Excellency and their older son and daughter were snapped on board the Empress of Britain just before Lady Bessborough and her son and daughter sailed for Europe recently.

Appropriation of one dollar was made recently by the Vancouver City Council as the nominal price for the purchase from the Canadian Pacific Railway of 1½ acres of right-of-way property at Kitimat Beach, near the British Columbia city.

The first Melancthon apples of the season for distribution throughout the Dominion from Victoria to Halifax went out recently over Canadian Pacific lines in trains of 45 cars. The fruit is reported to be in wonderful condition and this season's product will maintain the great reputation that British Columbia has won for its apples.

Under the Canadian Pacific five years' free scholarship award to McGill University, Resaie McCallum, of Montreal; David R. W. Reid, of Winnipeg, and Albert Grant Aglin, of Lethbridge, all sons of company employees, are announced as this year's winners. The scholarships are renewable every year up to five years if the holders are entitled to full standing in the next higher year.

"There is very clear evidence of a return to prosperity in Canada due to a greater feeling of confidence," was a recent declaration of Lord Elphinstone, of more British trade papers than any other publisher in the United Kingdom, interviewed aboard the Empress of Britain.

From every state of the Union and every province of the Dominion delegates to the 11th convention of the Sovereign Grand Lodge of the Independent Order of Oddfellows assembled in convention at the Royal York Hotel, Toronto, recently. They were greeted by the Lieutenant-Governor of Ontario and the Mayor of Toronto.

Redcliff Reminiscences

Taken From the Review File of
October 22nd 1915

100,000 men have enlisted from Canada.

Mrs. George Grievie, ardent, went a serious operation in the clinic Hat hospital on Tuesday.

Chas. Oakland left this week for the front with the 50th battalion from Sarcee Camp.

A field of potatoes south of town yielded 700 bushels.

Yesterday, the thermometer registered 90 degrees in the sun. Great Country!

DOMINION OF CANADA

1934 REFUNDING LOAN

The Minister of Finance offers for public subscription

Two-year 2% Bonds, due 15th October, 1936
Issue price: 98.50 and accrued interest, yielding 8.67% to maturity.
Five-year 2½% Bonds due 15th October, 1939
Issue price: 98.15 and accrued interest, yielding 8.00% to maturity.
Eight-year 3% Bonds, due 15th October, 1942
Issue price: 97.00 and accrued interest, yielding 8.45% to maturity.
Fifteen-year 3½% Bonds, due 15th October, 1949
Issue price: 96.50 and accrued interest, yielding 9.81% to maturity.

Principal payable without charge in lawful money of Canada at the Head Office of the Bank of Canada, Ottawa, or at any of its branches in Canada. Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any chartered bank.

Denominations

Two-year Bonds, \$1,000
Five-year Bonds, \$500 and \$1,000
Eight-year Bonds, \$500 and \$1,000
Fifteen-year Bonds, \$100, \$500 and \$1,000

Cash Subscriptions

All cash subscriptions will be subject to allotment. Following the announcement of the plan of allotment, payment in full for the bonds allotted must be made promptly against delivery of interim certificates, which will be effected on or about 15th October.

Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1934, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 2% Bonds and the Five-year 2½% Bonds.

100% of their par value on subscriptions for the Eight-year 3% Bonds if effected on or before 6th October, and 100% of their par value after that date.

100% of their par value on subscriptions for the Fifteen-year 3½% Bonds if effected on or before 6th October, and 100% of their par value after that date.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to \$250,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada. The proceeds of this Loan will retire \$22,216,250 Dominion of Canada 5½% Bonds maturing 1st November, 1934. The balance will be used for the general purposes of the Government, including the redemption of short-term Treasury Bills.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognized Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists will open 1st October, 1934, and will close on or before 15th October, 1934, with or without notice, at the discretion of the Minister of Finance.

Where Inventors Fail

No Device Yet Developed To Start Or Stop Rain

With drought gripping many sections of the country many suggestions for stopping it poured into the U. S. weather bureau at Washington. Officials said just as many are received for stopping floods in times of excessive rainfall. In fact, they received a simple cause, for people to use the wide use of radio, is often advanced for both drought and flood.

"No device yet developed by man to any practical value in starting or stopping rain," Dr. W. J. Humphreys, of the weather bureau, said. "Obviously, radio, which neither hastens nor retards evaporation and does not cool the air or in any way promote condensation of the moisture in the air, cannot be a factor in promoting or hindering rainfall."

Nature's method of making rain, Dr. Humphreys explained, is first to get an abundance of water into the atmosphere by evaporation from water surfaces, ice surfaces, growing vegetation, and damp soil, and then to squeeze it out by lowering the temperature.

"Ordinarily," he said, "there is enough moisture in the air to provide at least a moderate rainfall wherever the machinery for its coming down into raindrops is working right. This machinery calls for the proper distribution and movement of air masses differing in temperature and density."

"In other words, when a normal movement of atmospheric air is interrupted and a relatively stagnant atmospheric condition is established over a period for a long time, drought develops, substantiating the fact that there may be enough moisture in the air to produce rain."

Dr. Humphreys said that electrical devices, sprinkling the clouds with dry ice, starting large fires, and setting off loud explosions are the other rain-making schemes suggested, either do not work or cost too much for practical use.

"The electrical schemes investigated by the weather bureau are utterly worthless," he said. "Sending cooling substances up into the clouds to cause rain after a century old," he added, "Even fog has been tried. This plan, however, is wrong in principle, and no rain has ever resulted from such practices."

The use of fire to produce rain was strongly advocated 80 or 90 years ago, and this suggestion continues to be put up for trial. This method is correct in principle, but the cost of a fire big enough to break a drought would be prohibitive.

England Has Extended

Order For Quietness

Vancouver Also Considering Ban On Unnecessary Noises

If you now your horn in England between 11:30 at night and seven in the morning you are liable to be arrested. This began September 16.

Recently London authorities placed a ban on motor horns. Now the order has been extended and England will be quieter than ever before.

Unnecessary noise in Vancouver will be banned if the city council acts on a recommendation of the police commission.

The commission has decided to ask the council to adopt a by-law which would prohibit motorists from unnecessary honking of their automobile horns, and ban radio, gramophones and other noise-making instruments.

If We Had Faith

Lives Would Be Happier And Less Worry-Addicted

If we would face the changes and chances of this mortal life in the simple faith that they are meant to be stepping-stones to a better life, we could face them with glad resolve to treat the heart of goodness out of what appears to us evil confident that all things must work together for good to those who love God, with whose useless friction and fretting we are constantly at odds, how much braver and happier our lives would be—Dean Jones.

Planets Are Not Warm

Dr. Walter S. Adams, of Pasadena, Calif., who has been making studies of the atmosphere of the planets, finds that only Venus and Mars have sufficient warmth to support life. The director of Carnegie Institution's Mount Wilson observatory, says that he does not believe that life exists on Venus and sees the possibility only of other than the most rudimentary forms on Mars.

Explains Historic Name

Qu'Appelle Was Called After First Church In Valley

Ashley Hookes, the man who returned the 47-year-old settler of Old Country doctors that he would die early of tuberculosis, has explained the belief concerning the historic name "Qu'Appelle" in Saskatchewan. Pauline Johnson, well-known Indian poetess, in one of her poems said Qu'Appelle means "who calls" and told of a young brave calling for his mate. He received no answer except the who which reverberated through the valley.

"The first church in the valley," said Ashley Hookes, "was a Catholic one called a 'Chappelle'." The word Qu'Appelle comes from the French "chappelle," he stated.

Counselor, adviser, doctor and white chief of the Sioux Indians on the Qu'Appelle valley reserve, the 47-year-old Englishman has lived the life of a near hermit for 48 years. In that time he has left the valley only for occasional trips to the annual game exhibition and one journey to England in 1897, the occasion of Queen Victoria's Diamond Jubilee.

At sixteen years of age, Old Country doctors gave Hookes just a few months to live before he succumbed to the ravages of tuberculosis. His coming to see some of the world before he died and possibly regain his health. Hookes left for Western Canada, settled in the Qu'Appelle valley. He learned the language of the Sioux and taught the braves to play hockey and hockey. He was a 70-day tuberculosis only a memory to the aging white chief and there is scarcely a gray hair in his head.

Free If You Like

London's Car Parker Pays Charge Up To 10 Minutes

J. Butterfield in the Vancouver Province says: "The English are not anywhere oblivious to the opportunities of the motor car. The motorization of the Old Country upon the vast scale that has occurred has produced many and varied forms of subsidiary services, not all of them commendable, but mostly tolerated."

The newest is the car parker. He is a well-appeared person of the same class as the better hall porter and he has a hand on the arm giving him authority under the city to oversee and control the parking and unloading of cars in city areas.

He guides you in and out with a sure hand and eye, takes you with a sure and precision born of experience into the most intricate street of traffic and if you want to know how intricate traffic can be, you must come to London to find out, and then you only to find "How much." He says: "There is no charge, it is left to you."

That phrase is as old as Adam and shows that it does not take a professor to understand psychology. For the victim will usually have a feeling of getting into the car, "I suppose that means a 'bok'."

Advantage Of Straw Loft

Keeps Temperature In Poultry House Uniform And Moderate

The poultry house that is provided with a straw loft has an advantage over some of the common type of houses in that a uniform and moderate temperature is more easily maintained in the straw-loft house owing to the cheap insulation afforded by the straw. This factor alone is worth much in a variable climate because losses in egg production often follow rapid temperature changes.

Sanitary conditions are maintained in a straw-loft house and sparrows and pigeons are kept out, there should be no trouble from flies or flies getting into the straw. The straw may be left in the loft indefinitely if kept dry and free from vermin.

Building according to specifications and plans from reliable sources is the only safe and economical procedure in constructing a hen house. Correcting mistakes once the house is built is costly. Properly constructed and managed, the straw-loft poultry house has proved very satisfactory.

Interesting Discovery

Repair which are now being carried out in the central site of the Basilica of St. John the Lateran brought to light the fact that underneath are two Roman buildings, one superimposed on the other. Excavation revealed two halls and from inscriptions found tended to indicate that the building was once a school and dates probably to the year 191 A.D.

Austrian Inventor Utilizes 'Hot Air'

Strange as it may seem, Herr Brunner, Austrian inventor, has designed a new balloon which requires no hot air. It rises solely on hot air. The basket carries a small oil-engine which heats the bag to any required temperature and can be shut off to permit the balloon to descend. The balloon was taken after Herr Brunner had completed successful trials near Berlin.

Interesting Memoirs

Sidelights Of Victoria Days Revealed In Private Papers And Letters

The second boy is the sharper," was the late Lord Esher's private opinion of the childhood qualities of the present Prince of Wales and the Duke of York. Lord Esher fully recognized the "charm of manner" of the elder boy.

This is revealed in the private letters and papers of Lord Esher, who served three British monarchs in intimate secretarial capacity. The papers are those of Sir Reginald Brett, second vicount, who died in 1930. He was keeper of the king's archives for many years, and for 13 years was a prominent member of the committee on imperial defence.

They contain old sidelights of Victoria and Edward on court days. Lord Esher viewed with mingled the changes around the throne after Queen Victoria's death. "It may be my imagination," he writes, "but the sanctity of the throne has disappeared. Edward's kind, do-beautiful, and not undignified, but he is too human."

Activity In Aviation

Commercial Companies Handling All The Traffic Their Facilities Will Permit

Winipeg—J. A. Wilson of Ottawa, Dominion controller of civil aviation, told the Aviation League of Manitoba activity in aviation at present was unparalleled.

Commercial companies were handling all the traffic, their facilities would permit and business was increasing, said Mr. Wilson, who has just returned from a coast-to-coast inspection tour of airports, flying clubs and air lines.

Amateur flying was also developing apace, he said. The controller said favorable progress was being made on the landing fields for the projected trans-Canada flying route, and that half the birds would be ready for daylight and fine weather use this year.

Legend Of The Unicorn

Purely Fabulous Creature Shown In British Coat Of Arms

The unicorn which figures in the British Royal Coat of Arms is a fantastic creature of Scotland and was introduced in the Royal Coat of Arms at the time of the Union of Scotland and England. The unicorn is a purely fabulous creature, having the head of a horse, the hind legs of an antelope, the tail of a lion and sometimes the head of a goat. The horn which projects from the centre of the forehead is similar to that of a narwhal.

Though as a rule savage and quarrelsome, the unicorn at mating-time was said to become very gentle to his mate, which is supposed to have given rise to the medieval idea that the unicorn was subdued to gentleness at the sight of a virgin, and would come and lay his head in her lap, which was the only means by which he could be caught. Because of his swiftness and ferocity, the picture of a unicorn on a drinking cup symbolized an ancient belief of the efficacy of the unicorn's horn (sometimes used as a drinking cup) against poison. Another medieval legend about the unicorn is that when it stooped to drink from a pool, its horn, dipping into the water, purified and rendered it sweet.

Voice Had Wrong Tone

So British Radio Announcer Lost His Job

A B.B.C. announcer had the job of announcing election results. His tone suggested to critical listeners that he did not like the results he was announcing.

Complaints were made, and he was dismissed. This revelation was made by A. Lloyd James, secretary of the Advisory committee on spoken English, in a lecture at the City of London vacation course on education, held at the Holborn restaurant.

Shanghai is the largest city in the Orient with a population of 3,150,141.

FANCIFUL FABLES

Windows Must Face West

New York Woman Has Reason For Strange Request

There is a woman in New York who insists her apartments must face west. She must see the sun go down "like thunder" as Kipling said, or she will not buy. This woman has been characterized as snobbish by real estate agents but this is not the fact, says one who accidentally discovered why this woman will never occupy a mile facing east. The story goes back a number of years to a lovely day at sea when a gay and brilliant party was aboard a yacht booming along miles out of sight of land. The boat was sailed by the woman's husband. A storm came out of the east and raged for hours, destroying the yacht. All but this woman, who will not live with her windows to the east, were lost.

When a northeaster is brewing her thoughts go back to the gay party and the harrowing end. Those thoughts remain in her mind to this day, leaving her under a nervous tension. This is the reason she will not rent an apartment with an eastern exposure. She was born in the West and wants the view from her city home to be in that direction.

A Handy Pamphlet

Tells How To Read And Pronounce Hotel Menus

Timid girls who dread that beguiling menu of French words in the menu would clear the way for having more fun and far more self-respect, may take the information with them when a boy invites them out to dinner. Fifteen pages on "How to Read and Pronounce Hotel Menus" are crowded into a little booklet by Robert M. Powell.

The guiding pamphlet to knowing what a menu means has been in the few weeks since it came out far more popular with women than with men. It says that seven out of 10 have been bought by young women.

To be able to delve into one's bag on short notice and learn that the "caviar" means that, the "saute" is a lamb, dishes, turkey, game, means cakes and glass is French for ice cream night supply of much of the world's fare for which most young girls and many older ones yearn. Men, it seems care less about being able to pronounce the foreign names of food.

Strange But True

Green Apples Preferred To Red In British West Indies

A peculiarity of the apple trade in the British West Indies and British Guiana is the fact that green apples sell for a better price than the red for many years. The reason for this is that the green apples have been Canada and the United States have been sold by street vendors, while green apples are preferred in their sale to the leading produce stores. Thus the people have been educated to believe the green apples are a higher quality product. The cold storage facilities at Halifax and Saint John and the regular service to the West Indies by the Canadian National Steamship "Lady Bona" have done much in promoting the apple trade with the British West Indies and British Guiana.

Film Sea Monster

Strange Creature Of Loch Ness To Be Seen In Movies

The Loch Ness sea monster will soon be seen in motion pictures. A British film group of 50 persons by means of telescopic lenses attached to a camera, was reported to have obtained several views of the creature from a distance of half a mile.

Captain Fraser headed the expedition which was financed by Sir Edwy Schreiner. The film was said to be sufficiently clear to permit a distinct view of the elusive monster in the Scottish loch.

The 1934 European wheat crop, says the Monthly Review, will fall short of the abnormal output of 1933. The point of major interest is the probable reduction in production in France, Germany and Italy. These countries constitute the most important element in determining import requirements in Continental Europe. In 1933 production in these three countries was so large that imports during the past crop year were abnormally small.

As a newspaper reporter we have learned only one thing: Never to be ready who was to blame for an automobile accident.

"Wonder what causes indignation?" "Frequently it is caused by the inability of a round stomach to adjust itself to a square meal."

Legend Of The Peace Pipe

Started With Thunder Storm According To Story Told Saskatoon

How came the Pipe of Peace? Legend says it all started with a thunderstorm.

And the legend was recalled recently in the Indian village of the south of Stintlaulsa made Fred Dunas, M.P.P., honorary Chief Buffalo. They passed the pipe around.

According to the legend told Cecil Perkins, of Montmartre, the Assiniboine, so many moons ago you could not count them had come through the severe winter remembered on the prairies. Horses were gone—horses were needed to hunt the buffalo. Warriors needed walk the no many old women.

Councils were held—and finally 25 or more brave dashed feathers, took weapons and turned faces toward the Blackfoot country. Honor and prestige depended on the success of a horse raid.

Moccasins grew thin and braves grew tired. But a camp had been established and the raiders planned the raiders silently closing on the band of Blackfeet as they slept that night.

The stratagems back of the raid had overlooked a gathering storm—thunder and lightning suddenly awaked and sleepers revealed the raiders.

The raiders recognized all No. 2 when they found they'd buried themselves in the camp of the Blackfeet—they would be pursued by hundreds.

The weary Assiniboines dug in their small hill to make their last stand. Blackfeet were turned back in their first attack and each side suffering equally. The Assiniboines realized their stand was hopeless. They must resort to strategy.

By night the pipe was finally accepted. He took the longest pipe the Assiniboines had with them and from each eagle feather and from the end of battle fought in honor on the eagle feather. These he fastened to the pipe stem—filled the pipe bowl with willow bark and lighted it.

Next thing the Blackfeet beheld was the sub-chief standing out in the open, grasping the smoking pipe in his right hand, high above his head. His left hand he raised aloft, palm open to the sky.

They were astonished they followed him to kill him. Legend says the smoke of his pipe carried up until it reached the curtains of the lodge of the Great Manitou. And it warmed his heart until he remembered the sufferings of the Assiniboines. The clouds were parted and a ray of sunlight came to earth and fell on the young sub-chief.

It shone upon the glory of his forehead. Slowly it left him and moved straight to the Blackfeet chief, who, by sign, the pipe was his. The sign, and, dropping his weapons, came to meet the Assiniboines.

By sign, the pipe was his. The sign, and, dropping his weapons, came to meet the Assiniboines. Friendship was offered and accepted. The sealing was in this manner.

Laying the pipe on his own left breast, then on his right, pointing east, west, north, south to the sides and earth, and then placing the pipe on the left and right breast of the Blackfeet chief, the Assiniboine gave the pipe to the other.

"From my heart to your heart, so the four winds may hear it, so the mother earth may know it, from your heart to my heart, let them pass. And in giving you this pipe with its eagle feather hanging, the honor of our land I place in your keeping." He feasted. Next day the Assiniboines started homeward, mounted on horses and went peacefully to their Blackfeet. Since that time the pipe has been used in all ceremonies where trust or honor has been given.

A Matter Of Taste

Members of the British Association for the Advancement of Science did not find their convention in Aberdeen, Scotland, the question of what constituted facial beauty. Prof. C. S. Myers observed that a girl regarded beautiful in Cyprus has a face like a frog, while the ideal beauty of one of the Balkan states, in his opinion, has a face like a horse.

Planned To Be Ready

Leith Hill, England, holds the grave of a man who died in 1775; he was buried upside down on horseback to be ready for the judgment day when the world would be reversed, according to the popular belief at that time.

Twelve million letters were carried in the aircraft of Imperial Airways during a recent period of 15 months.

WORLD HAPPENINGS BRIEFLY TOLD

Traffic earnings of the Canadian Pacific Railway Company for the week ended Sept. 14 totalled \$2,942.00, as compared with \$2,694.00 in the corresponding period last year, an increase of \$248.00.

Jeffrey Arnott, assistant purchasing agent of the Canadian Pacific Railway, has been promoted to the post of assistant purchasing agent with headquarters at Vancouver. H. W. Roberts, general purchasing agent, Montreal, announced.

Canadian farm products exported to the United States in August were valued at \$1,364,000, an increase of more than \$200,000 compared with the corresponding month last year when they amounted to \$1,163,000, the Dominion bureau of statistics reported.

The cost of living in England increased by one per cent. during August, the Labor Ministry Gazette stated. Taking July, 1914, as the average, the cost of living index was 148 per cent. on September 1 compared with 143 on August 1. The index stood at 141 in September, 1913.

Full freedom for civil servants to participate in politics, even to the extent of being a candidate in the federal, provincial or municipal arena, through leave of absence without pay, will be sought during the coming session of parliament by the Unaffiliated Civil Servants of Canada.

Grave fears as to the survival of the French-Canadian race as a distinct entity on Canadian soil are held by Mayor Camille Houde, of Montreal. Speaking at a ceremony to commemorate the arrival in Canada of Jacques Cartier, Mayor Houde questioned the likelihood of the race's survival.

The weekly illustrated paper, "Canada," published in London for the past 27 years, is being merged with another weekly, the "Canadian Gazette." The editor and founder of the former publication, Walter LeRoy, close 37 years of prominent association with Canadian news in London.

Minister of Finance E. N. Rhodes declined to say definitely whether Canada would follow the lead of the United States and nationalise silver. An assurance was sought by two Montreal silver exchange officials, but the finance minister said he could not be expected to make any definite statement on a government policy of such importance.

WHAT DOES YOUR HANDWRITING SHOW?

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

The increased interest in Grapho-Analyst, the science of character delineation from handwriting, has brought in the train not only a host of converts, but the inevitable quacks.

One of the most frequent objections is posed by those who ask how can handwriting show one's character, when we are taught how to write from the same copybook in school?

The answer to this objection only proves how strongly handwriting does show character. Because if you will study the writing of a single class of students who have learned to write from the same copybook a few years afterwards, you will not find two who write alike.

Each one writes differently—a different slant, a different pressure, and differing conformations of letters. This shows that, as one grows, one's character changes and one's handwriting changes too.

And, whilst this is the case, I would like to stress that it is not possible to tell a person's age or sex from handwriting. Here and there, a trained grapho-analyst will be able to hazard a guess. There is no scientific foundation for it, however.

Grapho-analyst will attempt it. I have seen women's writing that looked masculine, and conversely I have examined the writing of men that looked for all the world like that of a woman. Then again some young men with a well-written hand, and on the other hand, I have seen the writing of a man of 50 which seemed to be that of a youth in his teens. We can only get from handwriting what is in it.

There is increasing evidence that certain ailments can be discerned from handwriting. People suffering from heart trouble reflect this condition in their writing.

But grapho-analysis has not yet attained the point where it is possible to analyse ailments from handwriting with any scientific accuracy. These are factors that time and continued research will attain, but character analysis from handwriting is an accomplished fact. And it is also true that vocational guidance can be given by trained grapho-analysts.

If you want to discover your own characteristics and traits, as revealed by your handwriting, take advantage of the offer made at the foot of this article.

D.N.—You are ruled by your heart! Impulsive, emotional, appeal will always draw your sympathy. You are inclined to get hysterical. There is evidence of good powers of concentration. If you get really interested in something, you will concentrate in concentrating all your powers on the subject.

These are, of course, merely brief extracts from analyses.

Would you like to know what your writing tells about you and your friends? You will be amazed at the revelation that will come. Send a letter in your normal writing, and state birth-date in each case. Enclose with each letter a stamped addressed envelope. Replies will be sent as soon as possible, but please allow at least two weeks. Address: Lawrence Hibbert, Grapho-Analyst, c/o Winnipeg News-Paper Union, 172 McDermott Ave. E., Winnipeg, Man.

Recipes For This Week

(By Betty Barclay)

BAKED CORN AND TOMATOES

2 cups cooked corn
3 cups tomatoes
1 teaspoon salt
Pepper
1 teaspoon sugar
1 cup fresh bread crumbs
3 tablespoons butter

Mix, seasonings with the corn and tomatoes and pour all into a greased baking dish. Spread the crumbs over the top, dot with the butter and bake in a moderate oven for one-half hour. This is a satisfactory way of utilizing left over corn or tomatoes.

BAKED PRUNES

Cover 3 pounds of prunes with cold water and let stand for four hours. Drain prunes and reserve the liquor; add ½ cup sugar to the liquor and boil until the sugar is dissolved, skimming if necessary. Place the drained prunes in a covered casserole, cover with hot liquor and bake in moderate oven (325 degrees F.) 40 minutes.

It appears that a saxophone belonging to a well-known jazz player was lost recently. We understand that, despite frantic efforts by his family and the neighbors, it was found.

Dodges High Taxes

Woman Of 50 To Marry Young Man
So State Will Not Get Her Money

Life to Antonio Moreira of Lisbon, Portugal, has consisted of one tax collector after another and now at the ripe old age of 50 she is going to strike back. She's going to marry a man of 24.

Court permission has been given for the marriage. Senora Moreira said she told the court that she knew she would die very shortly and that "it would be a sin if I died and all my belongings should pass over to the state's treasury, which did nothing all through my life but collect taxes."

In marrying a young man, she was sure that her possessions would mean a good chance in life for him who, strong and young, might then be happier in life, despite the high taxes.

To Safeguard Pedestrians

Beacons To Be Erected In London
Streets For This Purpose

"Belshazzar's Banquet" will be erected for protection of London pedestrians, another feature of the war on motor accidents. They get their name from Leslie Hore-Belshazzar, minister of transport, who presided at a conference when it was decided to introduce them.

These are points seven feet high with a yellow-white glass globe, unlighted, at the top. They will be put at the crossing-places for pedestrians. In the dark they will reflect headlights a quarter of a mile away.

Restraint Frauds

The Winnipeg Free Press says: "Sir Ronald Lindsay on his return to Washington gave an interview to the press in which he disclosed unpalatable enthusiasm for a Britisher—on the conditions in the light little island of Australia. He said that 'Britain is getting on, after a fashion.'"

The deepest safe diving limit for any submarine yet constructed is 500 feet.

The SNAPSHOT GUILD

School Ahead! Pictures, Too!

Excitement is part of the picture at any football game. It's easily worth the missing of one play to get an over-the-shoulder shot like this

ABOUT this time of year, school is in everybody's mind; not only students and teachers, but parents, aunts, and uncles.

And if there ever was a map-shooter's paradise, it's school. It may be a one-room school or it may be a great university. Wherever, what ever it may be, it's crammed with uncountable picture possibilities.

Yet we might as well face the silly fact of the matter—few snapshots make the most of school's map-shooting opportunities.

Perhaps they are dashed by the very wealth the material is in the hand. More likely, they assume that someone else is going to take the picture. And that's a fatal mistake.

For nobody else can see things as they see them. And it's what you see that means most to you—and to the folks at home, now or years from now.

The question, then, is how to make the most of school's picture possibilities. A little planning will do the trick.

First, about the right camera for school. Any camera will do, providing it is clean and in good order and uses the kind of film that is easily available anywhere. If you have a fast lens and a fast shutter, you will have an advantage in taking those snapping events, such as a camera flash or a basketball shot.

Then, how can snapshooting be planned? All of it, of course, cannot be planned, but we understand important shots can be. Why not plan a scenario, Hollywood fashion?

Only the best can give the most enjoyment

Makes Rubber Horsehoes
Jan Bailey, proprietor of a Prigue pottery works, has started making real shoes for horses—out of rubber. He claims that they last 12 times as long as metal shoes and do not slip. The designer of these shoes, as his shoes are much more suitable for the cobble streets and squares of Central Europe, especially with slippery in summer. They give a half the weight of metal.

To Study Socialism
B.C. Economic Council to Investigate
Conditions in Other Countries
British Columbia's Economic Council, an investigatory and advisory body to the government, is studying conditions in countries where socialist parties are in control, with a view to seeing if practical application can be made of various plans to improve living standards and working conditions.

Hon. G. F. Pearson, minister of labor, to whom the council reports, said a special study is being made of conditions in Sweden, and that this would be followed by a review of working conditions and living standards in some other countries.

The work of the council would have to be recast, Mr. Pearson said, to bring its operations to their full utility. There was a misconception in the public mind as to the functions of the council, which was primarily for research with a view to recommending means toward economic improvement in the province. No quick results could be expected as a result of research would have to be undertaken.

Flying At High Altitudes

Wiley Test Seen Past Time Made In
Upper Stratos In Near Future

Wiley Post, round-the-world flyer whose most recent interest has been an experiment with an aeroplane that would make commercial flying practicable at altitudes of around 40,000 feet, arrived in Vancouver recently.

Since he completed his solo flight around the world in the record time of seven days, 15 hours and 49 minutes, Post has been working at development of a high altitude ship. He said he believes his machine is capable of sustained flight at around 40,000 feet and will make 350 miles per hour at that altitude. He is certain high altitude flying will be commercially general before long.

For flights of 350 miles it will be necessary for the pilot to rise at least to 20,000 feet. Post said, and for longer flights, machines will travel from 40,000 to 50,000 feet above the earth.

The Newest Occupation

Club In London Arranges Flowers
In People's Homes

It seemed that a flower club has been formed in London, England, for the purpose of arranging flowers in people's homes who are either too busy or want their house looking particularly nice for a party. You pay a subscription from 20 to 40 guineas a year. A woman expert comes to your house examines your color scheme and arranges to supply you with flowers for the year ahead. You can be as eccentric as you wish and she will bring you anything from blue poinsettias to zebra lilies.

Estimates set the cost of the proposed inter-American highway from Alaska to Argentina at \$160,000,000.

Foiled highway is likely to fade in strong sunlight.

Little Journeys In Science
GOLD FROM THE SEA
(By Gordon H. Gould, M.A.)
Science has shown that there is gold in the sea, but the authorities on this subject are in dispute as to the quantity. Figures given indicate that there are about 100 ounces of the precious metal for each of the two billion inhabitants of the earth, which would amount to \$24,000 per person if gold is valued at \$25 per ounce.

Is it any wonder then, that ever since chemistry became an exact science, plans have been proposed to mine this wealth from the sea? One famous scientist lured by the idea was the late Dr. Fritz Haber, who was awarded the Nobel prize for his method of producing ammonia gas from the air. He found such small amounts in sea water that he concluded the idea was impractical. In his opinion there is more gold in the living organisms of the sea than there is in the sea water.

Recent developments seem to indicate that the chemist of the next decade may be able to extract gold from sea water commercially. This is based upon the fact that a plant has been built in the United States for the extraction of bromine from the ocean.

Bromine is used in the production of ethyl gasoline and hence is in great demand. For years ago chemists turned to sea water for bromine, even though it contained only seventy parts of bromine in a million of water. Very large quantities of water must be treated—2,000 gallons to obtain a pound of bromine.

It is easy to see why scientists talk so confidently of securing gold from sea water. Bromine is only worth twenty cents a pound whereas gold is valued at about \$35 an ounce. Thus, in spite of the fact that there is much less gold than bromine in sea water, science is hopeful of mining gold on a commercial scale from the ocean. It has been estimated that there are about 100 million tons of about \$25,000,000 a cubic mile.

Slipping Nink On Glacier

James Simpson, guide, naturalist and artist, has scrambled smooth the surface of a glacier lying between two mountains near Banff, Alberta. He has been skating for his husky daughters, Mary and Margaret. He said skating on glaciers will be common in a few years.

"How do you make your living?" "Selling things to men who go fishing."

"That's interesting. How is the fishermen's equipment business?" "I don't know. You see, I run a fish market."

The number of sheep in New Zealand as shown by the returns on April 30, 1934 was 25,560,770 an increase of 600,000 compared with the corresponding date in 1933.

Women want men to be sturdy oaks—and spruce.
